PROFILE

First-year BS Software Engineering student at the University of Peshawar. I have hands-on experience editing videos and photos, and I am currently learning to code in C++, Python, HTML and CSS. I built my portfolio website from scratch without templates or frameworks. I am at the start of my career and looking for small projects where I can contribute carefully, learn quickly and build a record of honest work.

EDUCATION

BS Software Engineering 2025 - 2029

Photo Editing

Picsart	100%
AI Tools	90%
Lightroom	80%
Photoshop	50%

Programming Languages

HTML & CSS	85%
C++	70%
Python	65%

PROJECTS

Personal Portfolio Website 2026
HTML, CSS, JavaScript - live at ahmadoafridi.github.io
My first real coding project. Hand-coded single-page site with dark/light mode, scroll animations, a WhatsApp contact form and a fully responsive layout. No templates or frameworks - one self-contained file with zero external dependencies.

WHAT I CAN DO

Video editing - reels, shorts and social clips: trimming, captions, transitions, music sync, colour work.
Photo editing - background removal, retouching, colour grading and social media graphics.
Simple web pages - one-page portfolio, CV or landing pages, hand-coded and published on GitHub Pages.
